SEOUL Youth Forum on the Urban SDGs

What are the SDGs and Urban SDGs?

Sustainable Development Goals(SDGs) are 17 goals and 169 targets to tackle multifaceted global problems set by the global society under the leadership of the UN. All countries are now expected to build their own agenda and political policies based on the principles of the Goals. Among the SDGs, the urban goal(Goal 11: ‘Make cities inclusive, safe, resilient and sustainable’) has been generating more in-depth discussions in many different levels as the urban development has now been highly relevant to the lives of more than half of the world's population and will have a greater impact on bigger population in the future.
